

# Borough of Madison

## Draft 5 Year Capital Plan

Presented to the Mayor and Council  
Monday December 14, 2015

Comments: Enclosed is a draft 5 year capital plan. No capital decisions are expected to be made at this time. Additional capital information will be provided to Council in January and February from the Borough staff as well as from consultants that are preparing critical asset reports for Water, Electric and Sewer.

The goal of this DRAFT report is to a) have a preliminary discussion on how much capital funding should be in the municipal budget, b) answer any questions about capital items listed and c) make Council aware of large capital projects in 2017 and beyond. A list of outstanding capital projects that are already funded and not completed is being compiled and will be forwarded to Council shortly.

Several exhibits are also included for educational purposes to help residents better understand municipal capital accounting and how it relates to the operating budget.

**EXPLANATION OF THIS EXHIBIT.** The Borough has a Capital Improvement Fund to separately account for municipal capital projects and equipment. This report shows the annual inflows and outflows to this capital 'savings' account as well as the available balance. In order to expend capital funds, Council must approve an "Improvement Authorization" by ordinance which requires two Council meetings and two votes. The first vote 'introduces' the ordinance. State statute requires that the ordinance then be advertised in the paper so the residents are informed of the possible expenditure. At the next meeting the Council holds a hearing, allowing residents the opportunity to discuss the project. After the hearing, the Council votes yes or no to fund the project. If approved, funds for that "Improvement Authorization" are then reserved for the project. Unlike the municipal budget, which is introduced in February - March, Capital Improvement Authorizations are introduced throughout the year. The Capital Improvement Fund pays for vehicles, road reconstruction, building & grounds, stormwater, sanitary sewer, fire trucks and other capital. The Borough has separate Capital Improvement Fund accounts for the Electric Utility and the Water Utility.

**KEY**

1. Beginning Balance: The amount in the Capital Improvement Fund at the beginning of the year.
2. Improvement Authorizations Cancelled: When an Capital Project is completed, any remaining funds that were reserved but not spend are returned back to the Capital Improvement Fund. An Improvement Authorization can stay 'open' a number of years until the project is complete, expecially if the project is complex or the work is done in stages.
3. Budget Appropriations: Amount of funds Council transferred from the municipal operating budget to fund future capital. This amount is listed as "Capital Improvement Fund" in the municipal budget. Council determines the amount of operating funds to transfer over based on available balances in the fund and upcoming capital projects.
4. Grant Funds: Non-municipal funds received to help pay for capital projects. Typically county and state funds.
5. Other Receipts: At times, another partner will help fund a capital project. In this instance, the capital project is completely funded by the Borough and then reimbursement funds are received by the partner. An example of this is when Division Avenue was repaved. Madison paid for the entire project and Chatham Borough reimbursed Madison for a portion of the project.
6. Improvement Authorizations: Funds that are reserved for specific capital projects (see above).
7. Ending Balance: the amount in the Capital Improvement Fund at the end of the year. Note, that the amount at the end of one year, is the same amount that is carried forward to the beginning balance for the following year.

### The relationship between the Capital Improvement Fund and the Operating Budget

Borough of Madison General Capital Fund Schedule of Capital Improvement Fund 2008 thru 2015 (in \$000's)

**What is the Borough's annual investment in capital?**

The most appropriate indicator is the combination of Improvement Authorizations and Debt Service (line 6 & 8 above).

Improvement Authorizations represent the actual capital projects that the Council approved for funding in that year. Debt Service represents the yearly principal and interest payments that pay for previously completed capital projects. Debt service is represented on line 23 and 24 on the Municipal Budget below.

The "Capital Improvement Fund" figure listed on the Municipal Budget (line 22 to the right) is NOT the best indicator of how much Capital the Borough spends annually.

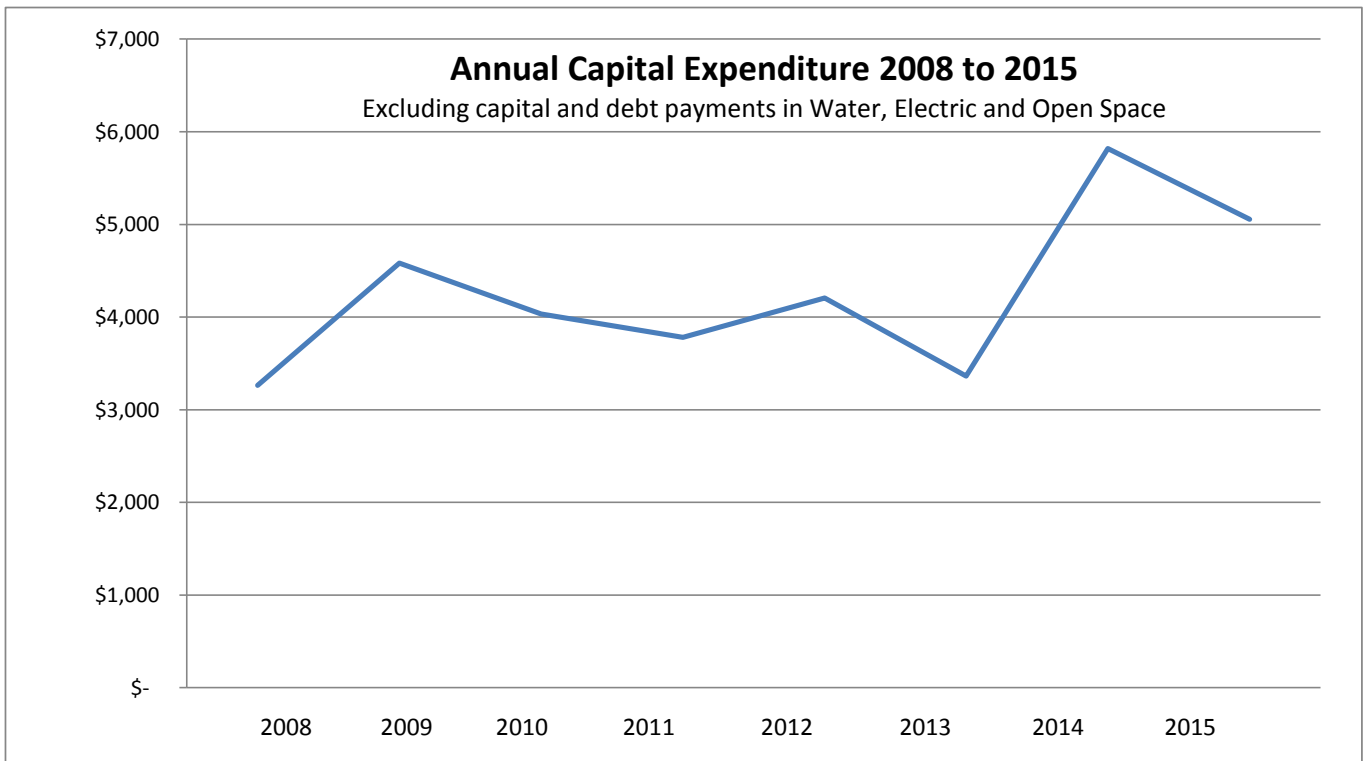

MUNICIPAL BUDGET SUMMARY OF REVENUE AND APPROPRIATIONS					
Line	REVENUE	2013	2014	INCREASE (DECREASE)	PERCENT CHANGE
