

# Borough of Madison, New Jersey

## COVID-19 Update 6/9/21

Since the arrival of COVID-19 in early March 2020, there have been a total of 874 confirmed (PCR test) and 337 probable (antigen test) COVID-19 cases reported in Madison Borough\*. The chart to the right shows the trend in reported cases over time. Fortunately, the number of new cases locally and statewide has recently decreased significantly and vaccination rates continue to increase. However, public health departments across the state will continue to closely monitor case activity and aggressively pursue contact tracing as statewide restrictions (masks, social distancing, travel advisories, etc.) have relaxed; case investigation and contact tracing efforts are even more important when COVID-19 activity is low.

\*More information on the definitions “confirmed” and “probable” as well as “PCR” and “antigen” tests can be found [HERE](#).

### COVID-19 Cases, Incidence Rate, Deaths, and Case Fatality Rates New Jersey vs. Morris County vs. Madison Borough

	Total Confirmed Cases	Total Probable Cases	Cumulative Incidence Rate per 100k	% of Cases Who Are Facility Residents*	Total Deaths	Overall CFR**	Total COVID Cases Reported by Facilities - Residents*	Total COVID deaths Reported by Facilities - Residents*	CFR** for Facility Residents*
New Jersey	889,255	129,052	10,012	3.7%	23,616	2.7%	32,758	7,869	24.0%
Morris County	41,888	8,279	8,517	4.4%	985	2.4%	1,827	528	28.9%
