

Total Projected Benefits (2018-2038) - Over the next 20 years, based on forecasted tree growth, i-Tree Design projects total benefits worth \$7,259:

- \$2,509 of stormwater runoff savings by intercepting 313,654 gallons of rainfall
- \$262 of air quality improvement savings by absorbing and intercepting pollutants such as ozone, sulfur dioxide, nitrogen dioxide, and particulate matter; reducing energy production needs; and lowering air temperature
- \$715 of savings by reducing 40,427 lbs. of atmospheric carbon dioxide through CO₂ sequestration and decreased energy production needs and emissions
- \$1,685 of summer energy savings by direct shading and air cooling effect through evapotranspiration
- \$2,087 of winter energy savings by slowing down winds and reducing home heat loss
